## Chapter 2

# Namespace Index

### 2.1 Packages

Here are the packages with brief descriptions (if available):

<a href="#">slider</a>	11
<a href="#">slider.lib</a>	11
<a href="#">slider.RSFSlider</a>	11

## Chapter 3

# Hierarchical Index

### 3.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

slider.RSFSlider.Example . . . . .	21
JDialog	
slider.lib.EditSliderDialog . . . . .	13
JFrame	
slider.RSFSlider.ExampleFrame . . . . .	22
JPanel	
slider.lib.SliderPanel . . . . .	68
JSlider	
slider.lib.MThumbSlider . . . . .	41
slider.lib.MThumbSliderAdditional . . . . .	59
slider.lib.MetalMThumbSliderUI . . . . .	28
slider.lib.MThumbSliderAdditionalUI . . . . .	61
slider.lib.SliderParameters . . . . .	78
MetalSliderUI	
slider.lib.MetalMThumbSliderUI . . . . .	28
MouseListenerAdapter	
slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler . . . . .	94

## Chapter 4

# Class Index

### 4.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

<a href="#">slider.lib.EditSliderDialog</a>	13
<a href="#">slider.RSFSlider.Example</a>	21
<a href="#">slider.RSFSlider.ExampleFrame</a>	22
<a href="#">slider.lib.MetalMThumbSliderUI</a>	28
<a href="#">slider.lib.MThumbSlider</a>	41
<a href="#">slider.lib.MThumbSliderAdditional</a>	59
<a href="#">slider.lib.MThumbSliderAdditionalUI</a>	61
<a href="#">slider.lib.SliderPanel</a>	68
<a href="#">slider.lib.SliderParameters</a>	78
<a href="#">slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler</a>	94

## Chapter 5

# File Index

### 5.1 File List

Here is a list of all files with brief descriptions:

src/slider/lib/ <a href="#">EditSliderDialog.java</a>	103
src/slider/lib/ <a href="#">MetalMThumbSliderUI.java</a>	103
src/slider/lib/ <a href="#">MThumbSlider.java</a>	103
src/slider/lib/ <a href="#">MThumbSliderAdditional.java</a>	103
src/slider/lib/ <a href="#">MThumbSliderAdditionalUI.java</a>	104
src/slider/lib/ <a href="#">SliderPanel.java</a>	104
src/slider/lib/ <a href="#">SliderParameters.java</a>	104
src/slider/RSFSlider/ <a href="#">Example.java</a>	104
src/slider/RSFSlider/ <a href="#">ExampleFrame.java</a>	104

## Chapter 6

# Namespace Documentation

### 6.1 Package slider

#### Packages

- package [lib](#)
- package [RSFSlider](#)

### 6.2 Package slider.lib

#### Classes

- class [EditSliderDialog](#)
- class [MetaMThumbSliderUI](#)
- class [MThumbSlider](#)
- interface [MThumbSliderAdditional](#)
- class [MThumbSliderAdditionalUI](#)
- class [SliderPanel](#)
- class [SliderParameters](#)

#### 6.2.1 Detailed Description

Slider Parameters.

### 6.3 Package slider.RSFSlider

#### Classes

- class [Example](#)
- class [ExampleFrame](#)

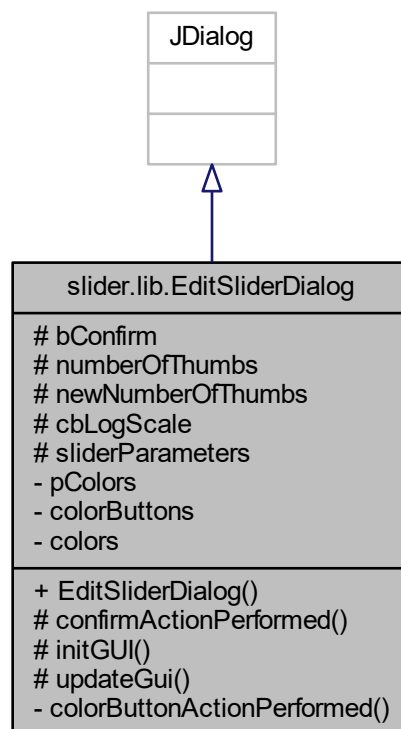

## Chapter 7

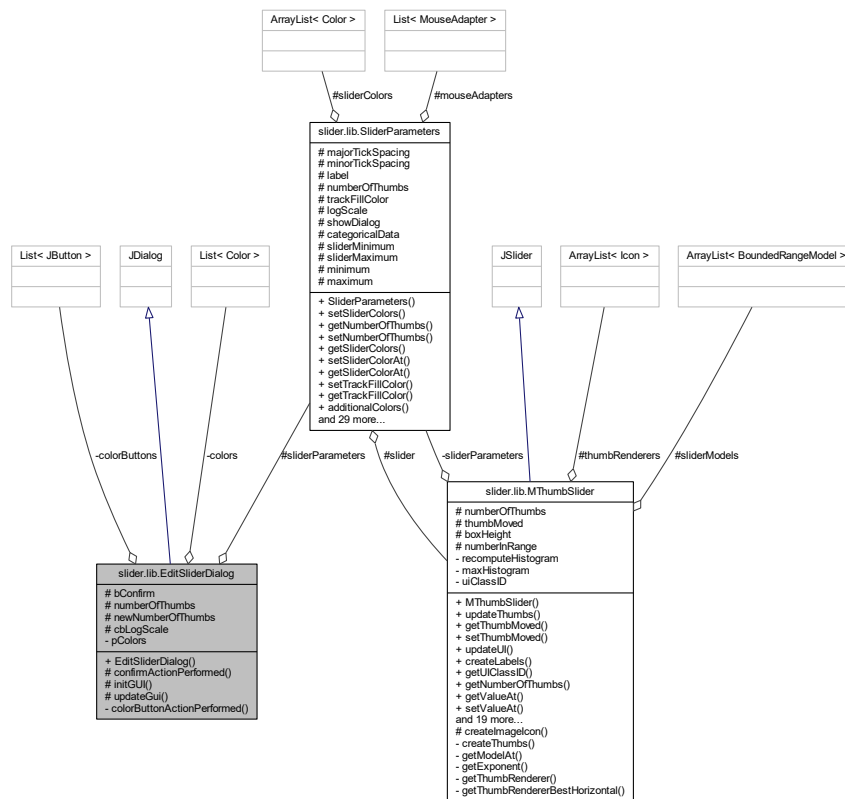

# Class Documentation

### 7.1 slider.lib.EditSliderDialog Class Reference

Inheritance diagram for slider.lib.EditSliderDialog:

Collaboration diagram for slider.lib.EditSliderDialog:

## Public Member Functions

- [EditSliderDialog](#) ([SliderParameters](#) sliderparam)

## Protected Member Functions

- void [confirmActionPerformed](#) ()
- void [initGUI](#) ()
- void [updateGui](#) ()

## Protected Attributes

- JButton [bConfirm](#)
- JLabel [numberOfThumbs](#)
- JSpinner [newNumberOfThumbs](#)
- JCheckBox [cbLogScale](#)
- [SliderParameters](#) [sliderParameters](#)

## Private Member Functions

- void [colorButtonActionPerformed](#) (ActionEvent ev)

## Private Attributes

- JPanel [pColors](#)
- List< JButton > [colorButtons](#) = new ArrayList()
- List< Color > [colors](#)

### 7.1.1 Detailed Description

Definition at line 13 of file EditSliderDialog.java.

### 7.1.2 Constructor & Destructor Documentation

#### 7.1.2.1 EditSliderDialog()

```
slider.lib.EditSliderDialog.EditSliderDialog (
    SliderParameters sliderparam )
```

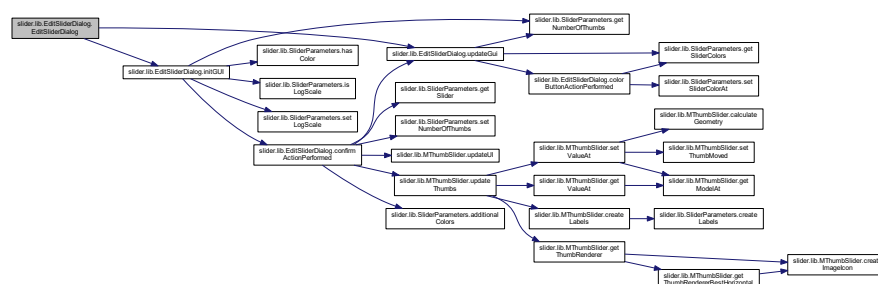

Constructor

Parameters

<i>sliderparam</i>	
--------------------	--

Definition at line 37 of file EditSliderDialog.java.

Here is the call graph for this function:

### 7.1.3 Member Function Documentation

#### 7.1.3.1 colorButtonActionPerformed()

```
void slider.lib.EditSliderDialog.colorButtonActionPerformed (  
    ActionEvent ev ) [private]
```

Color choosing action

## Parameters

<code>ev</code>	is an action event that stores the action command when a button is pressed. is a string.
-----------------	--

Definition at line 134 of file EditSliderDialog.java.

Here is the call graph for this function:

Here is the caller graph for this function:

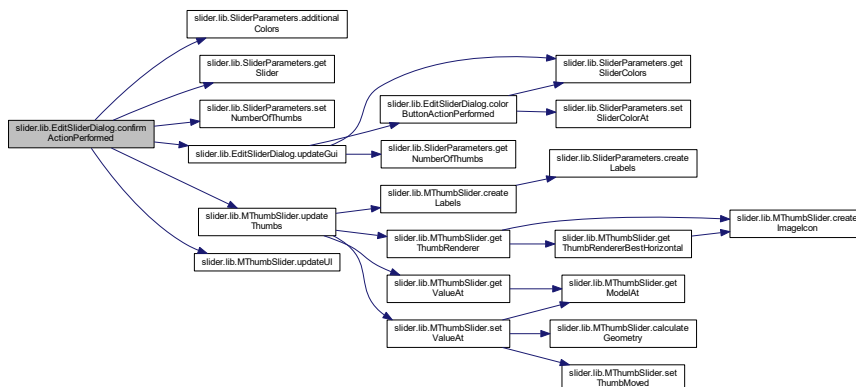

## 7.1.3.2 confirmActionPerformed()

```
void slider.lib.EditSliderDialog.confirmActionPerformed ( ) [protected]
```

Confirm Button Action

Definition at line 55 of file EditSliderDialog.java.

Here is the call graph for this function:

Here is the caller graph for this function:

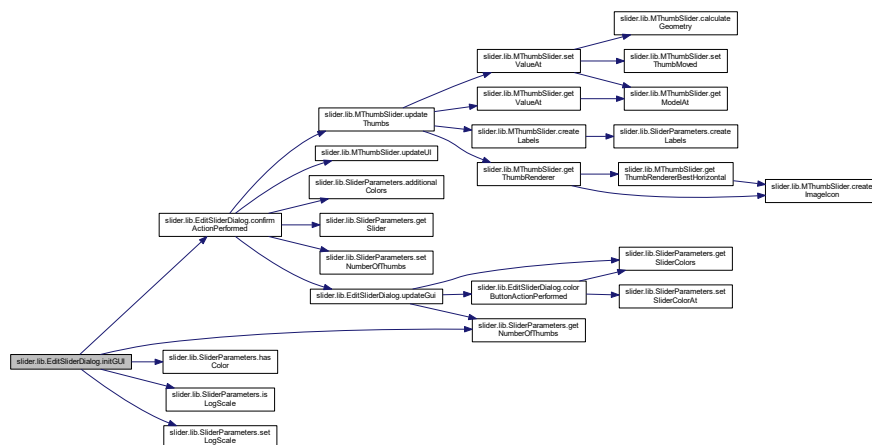

### 7.1.3.3 initGUI()

```
void slider.lib.EditSliderDialog.initGUI ( ) [protected]
```

Create Content

Definition at line 75 of file EditSliderDialog.java.

Here is the call graph for this function:

Here is the caller graph for this function:

### 7.1.3.4 updateGui()

```
void slider.lib.EditSliderDialog.updateGui ( ) [protected]
```

Update content

Definition at line 148 of file EditSliderDialog.java.

Here is the call graph for this function:

Here is the caller graph for this function:

## 7.1.4 Member Data Documentation

### 7.1.4.1 bConfirm

```
JButton slider.lib.EditSliderDialog.bConfirm [protected]
```

Definition at line 18 of file EditSliderDialog.java.

### 7.1.4.2 cbLogScale

```
JCheckBox slider.lib.EditSliderDialog.cbLogScale [protected]
```

Definition at line 23 of file EditSliderDialog.java.

#### 7.1.4.3 colorButtons

```
List<JButton> slider.lib.EditSliderDialog.colorButtons = new ArrayList() [private]
```

Definition at line 29 of file EditSliderDialog.java.

#### 7.1.4.4 colors

```
List<Color> slider.lib.EditSliderDialog.colors [private]
```

Definition at line 30 of file EditSliderDialog.java.

#### 7.1.4.5 newNumberOfThumbs

```
JSpinner slider.lib.EditSliderDialog.newNumberOfThumbs [protected]
```

Definition at line 21 of file EditSliderDialog.java.

#### 7.1.4.6 numberOfThumbs

```
JLabel slider.lib.EditSliderDialog.numberOfThumbs [protected]
```

Definition at line 20 of file EditSliderDialog.java.

#### 7.1.4.7 pColors

```
JPanel slider.lib.EditSliderDialog.pColors [private]
```

Definition at line 28 of file EditSliderDialog.java.

#### 7.1.4.8 sliderParameters

```
SliderParameters slider.lib.EditSliderDialog.sliderParameters [protected]
```

Definition at line 25 of file EditSliderDialog.java.

The documentation for this class was generated from the following file:

- [src/slider/lib/EditSliderDialog.java](#)

## 7.2 slider.RSFSlider.Example Class Reference

Collaboration diagram for slider.RSFSlider.Example:

### Static Public Member Functions

- static void [main](#) (String args[])

#### 7.2.1 Detailed Description

Definition at line 3 of file Example.java.

#### 7.2.2 Member Function Documentation

##### 7.2.2.1 main()

```
static void slider.RSFSlider.Example.main (  
    String args[] ) [static]
```

Definition at line 6 of file Example.java.

The documentation for this class was generated from the following file:

- src/slider/RSFSlider/[Example.java](#)

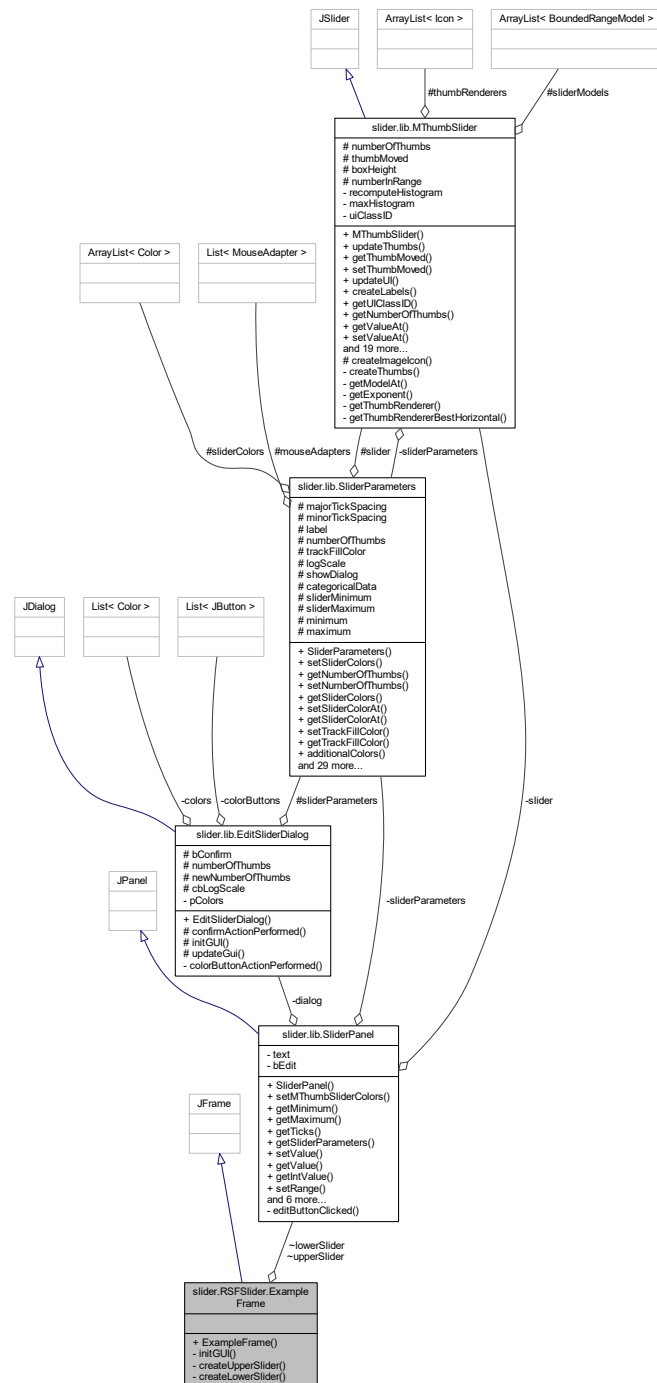

### 7.3 slider.RSFSlider.ExampleFrame Class Reference

Inheritance diagram for slider.RSFSlider.ExampleFrame:

Collaboration diagram for slider.RSFSlider.ExampleFrame:

## Public Member Functions

- `ExampleFrame ()`

## Package Attributes

- SliderPanel upperSlider
- SliderPanel lowerSlider

## Private Member Functions

- void `initGUI` ()
- void `createUpperSlider` ()
- void `createLowerSlider` ()

### 7.3.1 Detailed Description

Definition at line 18 of file `ExampleFrame.java`.

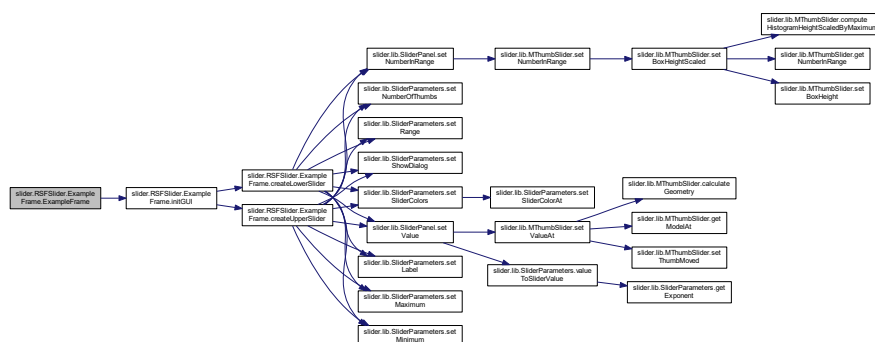

### 7.3.2 Constructor & Destructor Documentation

#### 7.3.2.1 `ExampleFrame()`

`slider.RSFSlider.ExampleFrame.ExampleFrame ( )`

Definition at line 25 of file `ExampleFrame.java`.

Here is the call graph for this function:

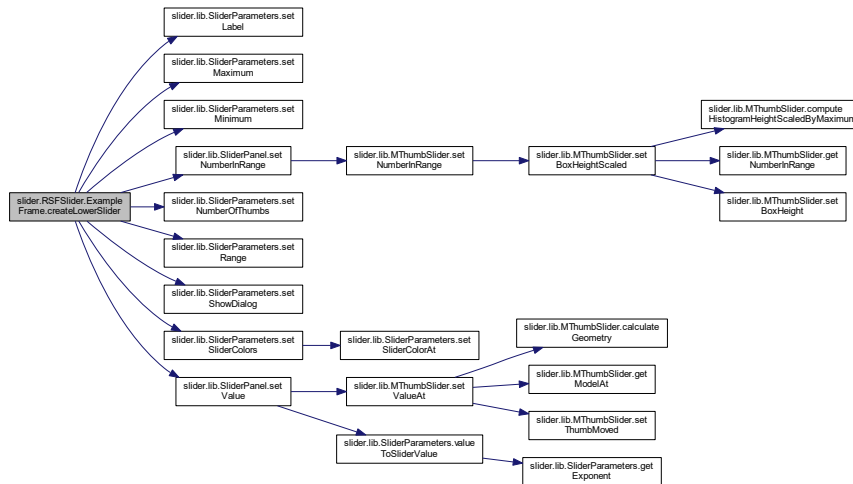

### 7.3.3 Member Function Documentation

## 7.3.3.1 createLowerSlider()

```
void slider.RSFSlider.ExampleFrame.createLowerSlider ( ) [private]
```

Definition at line 92 of file ExampleFrame.java.

Here is the call graph for this function:

Here is the caller graph for this function:

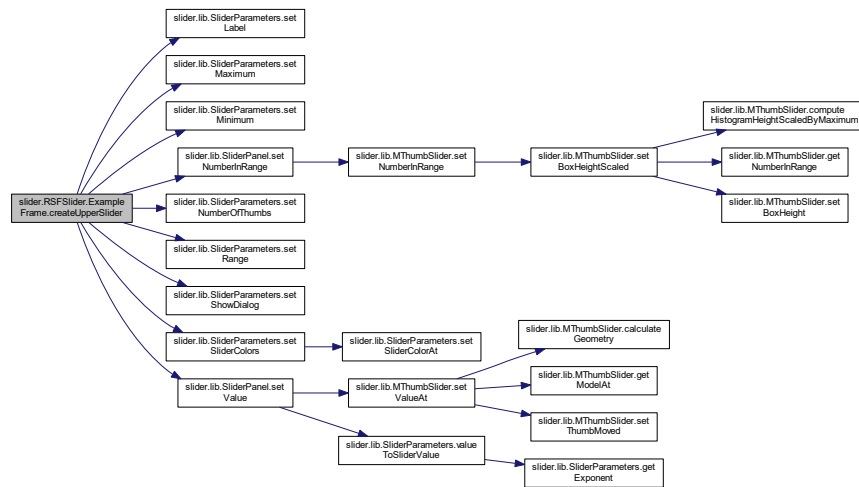

## 7.3.3.2 createUpperSlider()

```
void slider.RSFSlider.ExampleFrame.createUpperSlider ( ) [private]
```

Definition at line 63 of file ExampleFrame.java.

Here is the call graph for this function:

Here is the caller graph for this function:

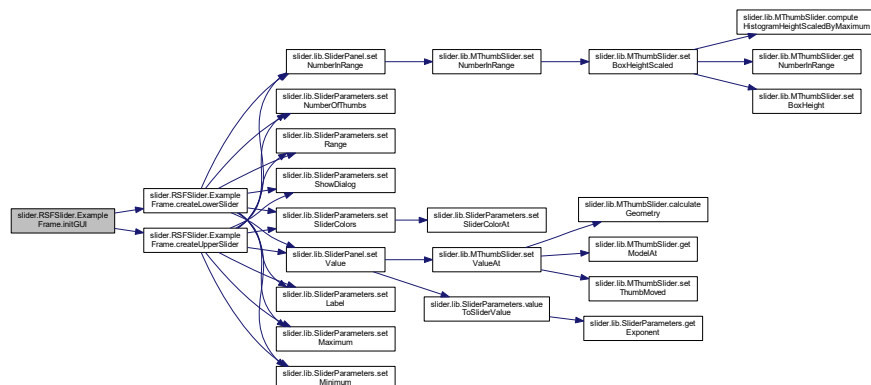

### 7.3.3.3 initGUI()

```
void slider.RSFSlider.ExampleFrame.initGUI ( ) [private]
```

Definition at line 39 of file ExampleFrame.java.

### 7.4.1 Detailed Description

This class provides the user interface behavior that is dependent of the look and feel.

Definition at line 16 of file MetalMThumbSliderUI.java.

### 7.4.2 Constructor & Destructor Documentation

#### 7.4.2.1 MetalMThumbSliderUI()

```
slider.lib.MetalMThumbSliderUI.MetalMThumbSliderUI (
    MThumbSlider parent )
```

Definition at line 30 of file MetalMThumbSliderUI.java.

Here is the caller graph for this function:

### 7.4.3 Member Function Documentation

#### 7.4.3.1 calculateGeometry()

```
void slider.lib.MetalMThumbSliderUI.calculateGeometry ( )
```

Definition at line 87 of file MetalMThumbSliderUI.java.

Here is the call graph for this function:

#### 7.4.3.2 calculateThumbLocation()

```
void slider.lib.MetalMThumbSliderUI.calculateThumbLocation ( ) [protected]
```

Definition at line 101 of file MetalMThumbSliderUI.java.

#### 7.4.3.3 computeX()

```
Point slider.lib.MetalMThumbSliderUI.computeX (
    Point pOrig,
    Rectangle thumbRect,
    Rectangle trackRect )
```

Definition at line 229 of file MetalMThumbSliderUI.java.

Here is the caller graph for this function:

#### 7.4.3.4 computeY()

```
Point slider.lib.MetalMThumbSliderUI.computeY (
    Point pOrig,
    Rectangle thumbRect,
    Rectangle trackRect )
```

Definition at line 244 of file MetalMThumbSliderUI.java.

Here is the caller graph for this function:

#### 7.4.3.5 createMThumbTrackListener()

```
MouseListener slider.lib.MetalMThumbSliderUI.createMThumbTrackListener (
    JSlider slider ) [protected]
```

Definition at line 53 of file MetalMThumbSliderUI.java.

Here is the caller graph for this function:

#### 7.4.3.6 createTrackListener()

```
TrackListener slider.lib.MetalMThumbSliderUI.createTrackListener (
    JSlider slider ) [protected]
```

Definition at line 59 of file MetalMThumbSliderUI.java.

#### 7.4.3.7 createUI()

```
static ComponentUI slider.lib.MetalMThumbSliderUI.createUI (  
    JComponent c ) [static]
```

Definition at line 25 of file MetalMThumbSliderUI.java.

Here is the call graph for this function:

#### 7.4.3.8 fillTrack()

```
void slider.lib.MetalMThumbSliderUI.fillTrack (  
    Graphics g,  
    Point t1,  
    Point t2,  
    Color fillColor )
```

Definition at line 259 of file MetalMThumbSliderUI.java.

Here is the caller graph for this function:

#### 7.4.3.9 getHorizThumbIcon()

```
Icon slider.lib.MetalMThumbSliderUI.getHorizThumbIcon ( )
```

Definition at line 479 of file MetalMThumbSliderUI.java.

#### 7.4.3.10 getOrientation()

```
int slider.lib.MetalMThumbSliderUI.getOrientation ( )
```

Definition at line 469 of file MetalMThumbSliderUI.java.

#### 7.4.3.11 getThumbSize()

```
Dimension slider.lib.MetalMThumbSliderUI.getThumbSize ( )
```

##### Returns

Implements [slider.lib.MThumbSliderAdditional](#).

Definition at line 442 of file MetalMThumbSliderUI.java.

#### 7.4.3.12 getTrackRect()

```
Rectangle slider.lib.MetalMThumbSliderUI.getTrackRect ( )
```

##### Returns

Implements [slider.lib.MThumbSliderAdditional](#).

Definition at line 432 of file MetalMThumbSliderUI.java.

#### 7.4.3.13 getVertThumbIcon()

```
Icon slider.lib.MetalMThumbSliderUI.getVertThumbIcon ( )
```

Definition at line 474 of file MetalMThumbSliderUI.java.

#### 7.4.3.14 installListeners()

```
void slider.lib.MetalMThumbSliderUI.installListeners (
    JSlider slider ) [protected]
```

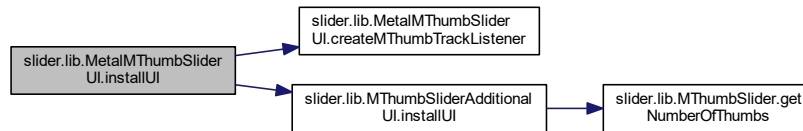

Definition at line 65 of file MetalMThumbSliderUI.java.

**7.4.3.15 installUI()**

```
void slider.lib.MetalMThumbSliderUI.installUI (
    JComponent c )
```

Definition at line 36 of file MetalMThumbSliderUI.java.

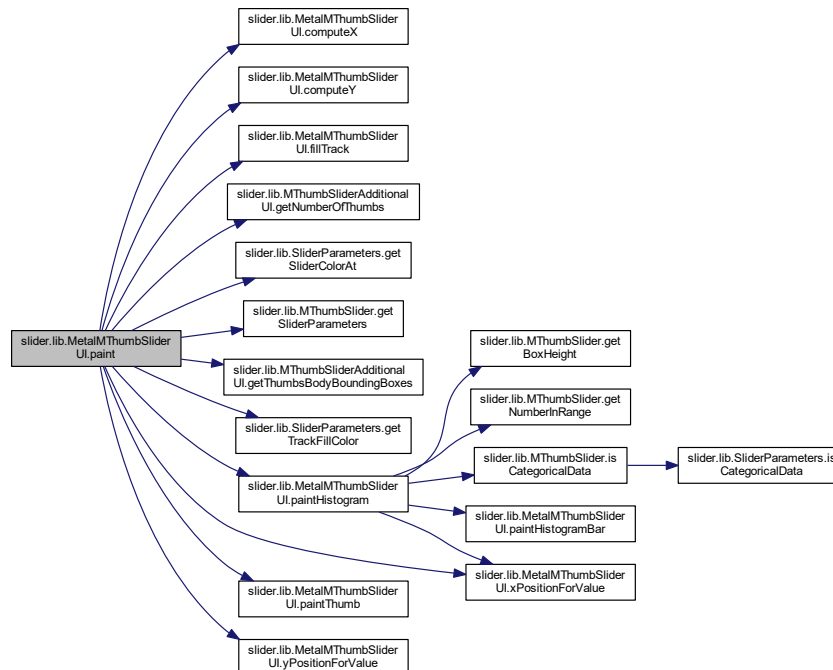

Here is the call graph for this function:

**7.4.3.16 paint()**

```
void slider.lib.MetalMThumbSliderUI.paint (
    Graphics g,
    JComponent c )
```

Definition at line 108 of file MetalMThumbSliderUI.java.

Here is the call graph for this function:

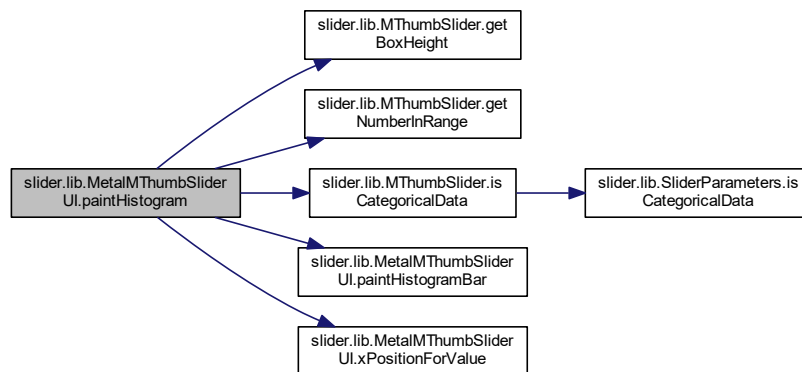

#### 7.4.3.17 paintHistogram()

```
void slider.lib.MetalMThumbSliderUI.paintHistogram (
    Graphics g ) [private]
```

Histogram

Definition at line 318 of file MetalMThumbSliderUI.java.

Here is the call graph for this function:

Here is the caller graph for this function:

#### 7.4.3.18 paintHistogramBar()

```
void slider.lib.MetalMThumbSliderUI.paintHistogramBar (
    Graphics g,
    int y,
    int xFrom,
    int xTo,
    int height,
    int numberInRange ) [private]
```

Definition at line 370 of file MetalMThumbSliderUI.java.

Here is the caller graph for this function:

#### 7.4.3.19 paintThumb()

```
void slider.lib.MetalMThumbSliderUI.paintThumb (
    Graphics g )
```

Definition at line 224 of file MetalMThumbSliderUI.java.

Here is the caller graph for this function:

#### 7.4.3.20 scrollByBlock()

```
void slider.lib.MetalMThumbSliderUI.scrollByBlock (
    int direction )
```

##### Parameters

<i>direction</i>	
------------------	--

Definition at line 410 of file MetalMThumbSliderUI.java.

#### 7.4.3.21 scrollByUnit()

```
void slider.lib.MetalMThumbSliderUI.scrollByUnit (
    int direction )
```

## Parameters

<i>direction</i>	
------------------	--

Definition at line 419 of file MetalMThumbSliderUI.java.

#### 7.4.3.22 uninstallListeners()

```
void slider.lib.MetalMThumbSliderUI.uninstallListeners (
    JSlider slider ) [protected]
```

Definition at line 76 of file MetalMThumbSliderUI.java.

#### 7.4.3.23 uninstallUI()

```
void slider.lib.MetalMThumbSliderUI.uninstallUI (
    JComponent c )
```

Definition at line 45 of file MetalMThumbSliderUI.java.

Here is the call graph for this function:

#### 7.4.3.24 xPositionForValue()

```
int slider.lib.MetalMThumbSliderUI.xPositionForValue (
    int value )
```

## Parameters

<i>value</i>	
--------------	--

**Returns**

Implements [slider.lib.MThumbSliderAdditional](#).

Definition at line 453 of file MetalMThumbSliderUI.java.

Here is the caller graph for this function:

**7.4.3.25 yPositionForValue()**

```
int slider.lib.MetalMThumbSliderUI.yPositionForValue (
    int value )
```

**Parameters**

<i>value</i>	
--------------	--

**Returns**

Implements [slider.lib.MThumbSliderAdditional](#).

Definition at line 464 of file MetalMThumbSliderUI.java.

Here is the caller graph for this function:

**7.4.4 Member Data Documentation**

#### 7.4.4.1 additionalUi

```
MThumbSliderAdditionalUi slider.lib.MetalMThumbSliderUI.additionalUi [package]
```

Definition at line 21 of file MetalMThumbSliderUI.java.

#### 7.4.4.2 mThumbTrackListener

```
MouseInputAdapter slider.lib.MetalMThumbSliderUI.mThumbTrackListener [package]
```

Definition at line 22 of file MetalMThumbSliderUI.java.

#### 7.4.4.3 parent

```
final MThumbSlider slider.lib.MetalMThumbSliderUI.parent [package]
```

Definition at line 23 of file MetalMThumbSliderUI.java.

#### 7.4.4.4 thumbRenderer

```
Icon slider.lib.MetalMThumbSliderUI.thumbRenderer [package]
```

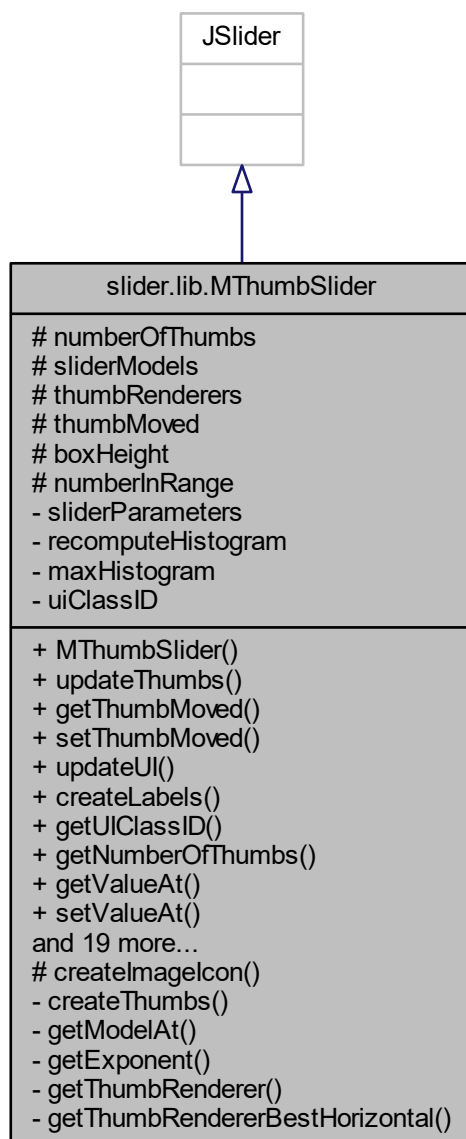

Definition at line 105 of file MetalMThumbSliderUI.java.

## 7.6 slider.lib.MThumbSliderAdditional Interface Reference

Inheritance diagram for slider.lib.MThumbSliderAdditional:

Collaboration diagram for slider.lib.MThumbSliderAdditional:

## Public Member Functions

- Rectangle [getTrackRect](#) ()
- Dimension [getThumbSize](#) ()
- int [xPositionForValue](#) (int value)  
*Gets the x position of thumb tip for that value on the slider body.*
- int [yPositionForValue](#) (int value)  
*Gets the y position of thumb tip for that value on the slider body.*

### 7.6.1 Detailed Description

This interface should be implemented by the following look and feel classes: [BasicMThumbSliderUI](#), [MetalMThumbSliderUI](#), and [MotifMThumbSliderUI](#). Nevertheless, currently only the [MetalMThumbSliderUI](#) is implemented.

Definition at line 9 of file [MThumbSliderAdditional.java](#).

### 7.6.2 Member Function Documentation

#### 7.6.2.1 getThumbSize()

Dimension slider.lib.MThumbSliderAdditional.getThumbSize ( )

Sets the bounding boxes of all thumbs

Implemented in [slider.lib.MetalMThumbSliderUI](#).

#### 7.6.2.2 getTrackRect()

Rectangle slider.lib.MThumbSliderAdditional.getTrackRect ( )

Gets the bounding box of the slider

##### Returns

the bounding box of the slider

Implemented in [slider.lib.MetalMThumbSliderUI](#).

## 7.6.2.3 xPositionForValue()

```
int slider.lib.MThumbSliderAdditional.xPositionForValue (
    int value )
```

Gets the x position of thumb tip for that value on the slider body.

Implemented in [slider.lib.MetalMThumbSliderUI](#).

## 7.6.2.4 yPositionForValue()

```
int slider.lib.MThumbSliderAdditional.yPositionForValue (
    int value )
```

Gets the y position of thumb tip for that value on the slider body.

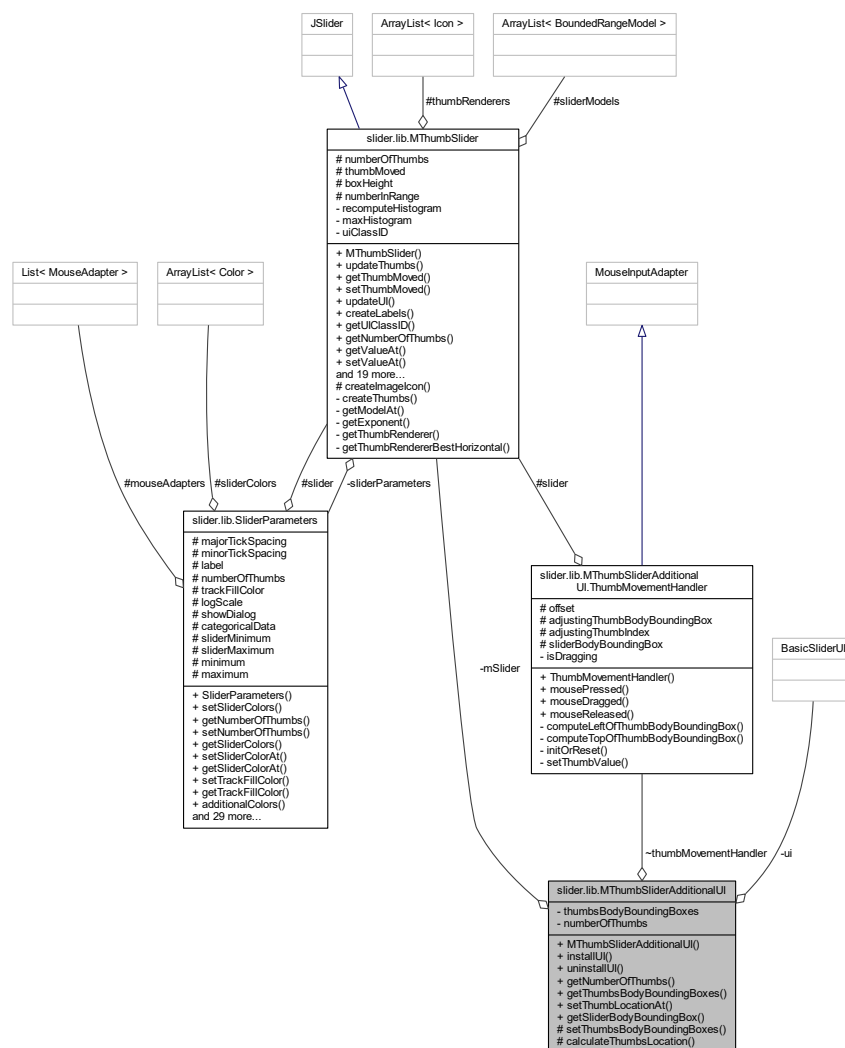

Implemented in [slider.lib.MetalMThumbSliderUI](#).

The documentation for this interface was generated from the following file:

- [src/slider/lib/MThumbSliderAdditional.java](#)

## 7.7 slider.lib.MThumbSliderAdditionalUI Class Reference

Collaboration diagram for slider.lib.MThumbSliderAdditionalUI:

## Classes

- class [ThumbMovementHandler](#)

### 7.7.3 Member Function Documentation

### 7.7.3.1 calculateThumbsLocation()

```
void slider.lib.MThumbSliderAdditionalUI.calculateThumbsLocation ( ) [protected]
```

Assures that the thumbtips are on the ticks of the slider and not some where in between.

#### Description

Gets the orientation of the slider, either vertical or horizontal

- Vertical case is not implemented yet

Assures that the thumbtips are on the ticks of the slider and not some where in between.

Gets the orientation of the slider, either vertical or horizontal (Vertical case **Not implemented yet**)

Gets the current thumb value

Gets the x position of thumb tip for that value on the slider body

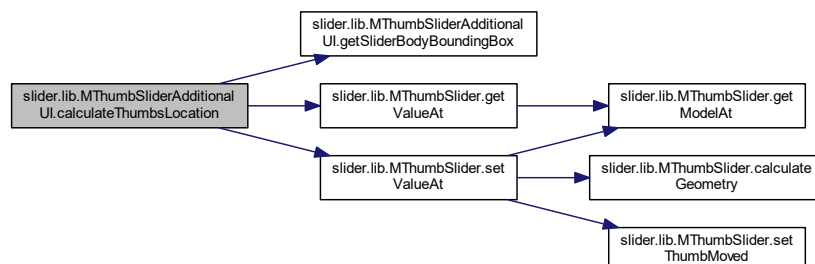

Sets the position of the left side of the current thumb to the position of the tip - half the width of the thumb

Distinguishes if we have an odd number of thumbs or an even number of thumbs

- case of even: the left half of the thumbs position will be below the slider and the right half of the thumbs position will be over the slider
  - Example: 8-> 16 -> 8 (for four thumbs)
- case of odd: the left half of the thumbs position will be below the slider, the middle thumb is in the middle of the slider body, and the right half of the thumbs position will be over the slider
  - Example: 8-> 8-> 8 -> 8 (for five thumbs)

Definition at line 101 of file MThumbSliderAdditionalUI.java.

Here is the call graph for this function:

Here is the caller graph for this function:

### 7.7.3.2 getNumberOfThumbs()

```
int slider.lib.MThumbSliderAdditionalUI.getNumberOfThumbs ( )
```

Gets the number of thumbs

**Returns**

the number of thumbs

Definition at line 194 of file MThumbSliderAdditionalUI.java.

Here is the caller graph for this function:

**7.7.3.3 getSliderBodyBoundingBox()**

```
Rectangle slider.lib.MThumbSliderAdditionalUI.getSliderBodyBoundingBox ( )
```

Gets the bounding box of the slider

**Returns**

the bounding box of the slider

Definition at line 271 of file MThumbSliderAdditionalUI.java.

Here is the caller graph for this function:

**7.7.3.4 getThumbsBodyBoundingBoxes()**

```
Rectangle [ ] slider.lib.MThumbSliderAdditionalUI.getThumbsBodyBoundingBoxes ( )
```

Gets the bounding boxes of all thumbs

**Returns**

the bounding box of all thumbs

Definition at line 204 of file MThumbSliderAdditionalUI.java.

Here is the caller graph for this function:

### 7.7.3.5 installUI()

```
void slider.lib.MThumbSliderAdditionalUI.installUI (
    JComponent c )
```

Sets the number of thumbs, thumbs body bounding boxes, thumb movement handler

#### Parameters

<i>c</i>	is the parent component
----------	-------------------------

Definition at line 57 of file MThumbSliderAdditionalUI.java.

Here is the call graph for this function:

Here is the caller graph for this function:

### 7.7.3.6 setThumbLocationAt()

```
void slider.lib.MThumbSliderAdditionalUI.setThumbLocationAt (
    int leftThumbBodyBoundingBox,
    int upperThumbBodyBoundingBox,
    int indexOfCurrentThumb,
    MThumbSlider slider )
```

This is the method for the cascading effect, there are two types of sliders, one vertical and another horizontal.

#### Parameters

<i>leftThumbBodyBoundingBox</i>	is the leftThumbBodyBoundingBox location of the thumb number <i>indexOfCurrentThumb</i>
<i>upperThumbBodyBoundingBox</i>	is the upperThumbBodyBoundingBox location of the thumb number <i>indexOfCurrentThumb</i>
<i>indexOfCurrentThumb</i>	is the <i>indexOfCurrentThumb</i> of the thumb whose location should be changed
<i>slider</i>	is the slider to change

**Description** Calculates the union of the old and the new bounding boxes of the thumbs to repaint the old one with

the background and the new one with the thumb  
 Definition at line 221 of file MThumbSliderAdditionalUI.java.  
 Here is the caller graph for this function:

### 7.7.3.7 setThumbsBodyBoundingBoxes()

```
void slider.lib.MThumbSliderAdditionalUI.setThumbsBodyBoundingBoxes ( ) [protected]
```

Sets the bounding boxes of all thumbs  
 Definition at line 83 of file MThumbSliderAdditionalUI.java.  
 Here is the caller graph for this function:

### 7.7.3.8 uninstallUI()

```
void slider.lib.MThumbSliderAdditionalUI.uninstallUI (
    JComponent c )
```

Unsets the thumbs body bounding boxes and the thumb movement handler (invalidating them).

#### Parameters

<code>c</code>	is the parent component
----------------	-------------------------

Definition at line 74 of file MThumbSliderAdditionalUI.java.

- void [setThumbValue](#) (int thumbIndex)

## Private Attributes

- transient boolean [isDragging](#)

*Transient boolean isDragging: if the thumb of the slider is being dragged.*

### 7.10.1 Detailed Description

Internal class for handling mouse events

Definition at line 279 of file MThumbSliderAdditionalUI.java.

### 7.10.2 Constructor & Destructor Documentation

#### 7.10.2.1 ThumbMovementHandler()

```
slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.ThumbMovementHandler (
    MThumbSlider slider )
```

Constructor. Here the slider is stored.

#### Parameters

<i>slider</i>	slider
---------------	--------

Definition at line 305 of file MThumbSliderAdditionalUI.java.

Here is the call graph for this function:

### 7.10.3 Member Function Documentation

#### 7.10.3.1 computeLeftOfThumbBodyBoundingBox()

```
int slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.computeLeftOfThumbBodyBoundingBox (
    Rectangle thumbBodyBoundingBox,
    int initLeftOfThumbBodyBoundingBox ) [private]
```

Computes and sets new position of the current thumb for the horizontally oriented slider

#### Parameters

<i>thumbBodyBoundingBox</i>	The thumb body bounding box
<i>initLeftOfThumbBodyBoundingBox</i>	The initial left of the thumbs bounding box

Definition at line 448 of file MThumbSliderAdditionalUI.java.

Here is the caller graph for this function:

### 7.10.3.2 computeTopOfThumbBodyBoundingBox()

```

int slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.computeTopOfThumbBodyBoundingBox
(
    Rectangle thumbBodyBoundingBox,
    int initTopOfThumbBodyBoundingBox ) [private]
  
```

Computes and sets new position of the current thumb for the vertically oriented slider

#### Parameters

<i>thumbBodyBoundingBox</i>	The thumb body bounding box
<i>initTopOfThumbBodyBoundingBox</i>	The initial top of the thumbs bounding box

Definition at line 473 of file MThumbSliderAdditionalUI.java.

Here is the caller graph for this function:

### 7.10.3.3 initOrReset()

```

void slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.initOrReset ( ) [private]
  
```

Reset offset, dragging, value\_adjusting

Definition at line 537 of file MThumbSliderAdditionalUI.java.

Here is the caller graph for this function:

### 7.10.3.4 mouseDragged()

```
void slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.mouseDragged (
    MouseEvent e )
```

Mouse was dragged.

#### Parameters

<i>e</i>	mouse event
----------	-------------

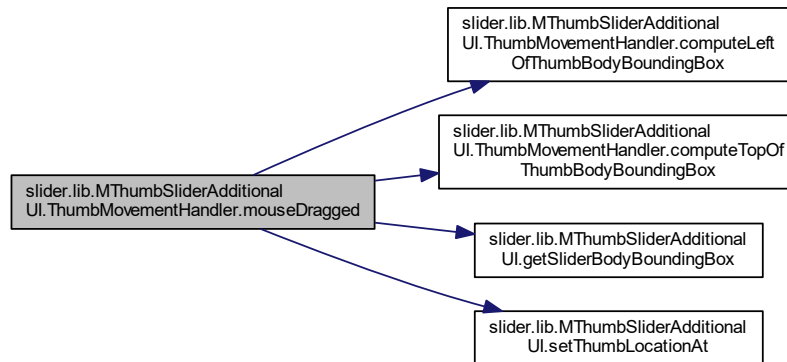

#### Description Checks

- if slider is enabled, i.e., can interact with the slider thumbs.
- if a thumb is dragged.
- if the bounding box of the thumb is set
  - Gets the bounding box of the dragged thumb
  - Gets the bounding box of the body (i.e., called Track) of the slider
  - Gets the orientation of the slider: either vertical or horizontal
  - Calculates the new position of the currently dragged thumb
    - \* Condition: The tip should not be positioned out of the slider body
      - if the tip position is smaller than the left of the slider body, position it to be on the left slider body position
      - if the tip position is larger than the right of the slider body, position it to be on the right slider body position

```
* Example: HORIZONTAL Slider orientation:
*
*      upper left
*      *-----*      |
*      \    /          |--> Thumb
*      !              |
*      thumb tip
*      -----
*      |   slider body   |
*      -----
*      left                right
*
```

Definition at line 386 of file MThumbSliderAdditionalUI.java.

Here is the call graph for this function:

### 7.10.3.5 mousePressed()

```
void slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.mousePressed (
    MouseEvent e )
```

Mouse was pressed.

#### Parameters

<i>e</i>	mouse event
----------	-------------

#### Description Checks

- if slider is enabled, i.e., can interact with the slider thumbs.
  - Gets the x position of the mouse when pressed from the mouse event
  - Gets the y position of the mouse when pressed from the mouse event
  - Put focus on the slider
  - For all thumbs
    - \* gets the bounding box of the thumb
    - \* if the current mouse position is inside the bounding box of the thumb
      - Compute the offset (i.e., the difference in the x and the y positions) of the mouse with respect to the upper left corner of the bounding box of the thumb. Depending whether the slider is vertical or horizontal.
      - set the dragging flag to true
      - store the bounding box of the thumb and the index of the thumb being adjusted
      - if the thumb is already found do not go through all thumbs

Definition at line 318 of file `MThumbSliderAdditionalUI.java`.

### 7.10.3.6 mouseReleased()

```
void slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.mouseReleased (
    MouseEvent e )
```

Mouse was released.

## Parameters

<i>e</i>	mouse event
----------	-------------

## Description Checks

- if slider is enabled, i.e., can interact with the slider thumbs.
- Set the value of all thumbs
  - for all thumbs before the released (dragged) thumb, set the new thumbs values (e.g.,  $10^{-13}$  in MCSs analysis or any label being shown), excluding the current released thumb
  - for all thumbs after the released (dragged) thumb, set the new thumbs values, including the current released thumb
- Calculate the thumbs sizes and their positions
- Reset offset, dragging, value adjusting to the initial values. to have a clean start for the next mouse action.
- Repaint the slider

Definition at line 497 of file MThumbSliderAdditionalUI.java.

Here is the call graph for this function:

## 7.10.3.7 setThumbValue()

```
void slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.setThumbValue (
    int thumbIndex ) [private]
```

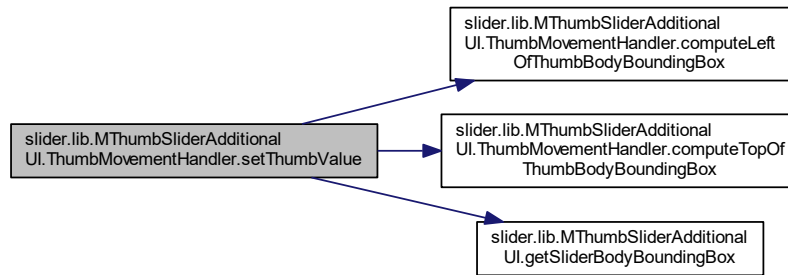

Set current thumb value.

## Parameters

<i>thumbIndex</i>	thumb index
	<p>&lt;B&gt; Description &lt;/B&gt;</p> <p>&lt;p&gt;</p> <p>Gets the thumb body bounding box and the track slider body bounding box</p> <p>Gets the orientation of the slider Vertical of horizontal</p> <p>Calculates the new position of the current thumb</p> <p>Sets the value of the current thumb to the value of its tip (if they are not the s</p>

Definition at line 556 of file MThumbSliderAdditionalUI.java.

Here is the call graph for this function:

Here is the caller graph for this function:

## 7.10.4 Member Data Documentation

### 7.10.4.1 adjustingThumbBodyBoundingBox

```
Rectangle slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.adjustingThumbBodyBoundingBox ←
Box = null [protected]
```

The bounding box of the thumb being adjusted.

Definition at line 289 of file `MThumbSliderAdditionalUI.java`.

### 7.10.4.2 adjustingThumbIndex

```
int slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.adjustingThumbIndex [protected]
```

The index of the thumb being adjusted.

Definition at line 292 of file `MThumbSliderAdditionalUI.java`.

### 7.10.4.3 isDragging

```
transient boolean slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.isDragging [private]
```

Transient boolean `isDragging`: if the thumb of the slider is being dragged.

Definition at line 283 of file `MThumbSliderAdditionalUI.java`.

### 7.10.4.4 offset

```
transient int slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.offset [protected]
```

The difference between the upper left corner of the bounding rectangle and the mouse position.

Definition at line 286 of file `MThumbSliderAdditionalUI.java`.

#### 7.10.4.5 slider

[MThumbSlider](#) slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.slider [protected]

The associated slider.

Definition at line 295 of file MThumbSliderAdditionalUI.java.

#### 7.10.4.6 sliderBodyBoundingBox

Rectangle slider.lib.MThumbSliderAdditionalUI.ThumbMovementHandler.sliderBodyBoundingBox [protected]

Definition at line 297 of file MThumbSliderAdditionalUI.java.

The documentation for this class was generated from the following file:
